

The 9meshes Towel Rolls series

The Nonwoven towel rolls 9mesh series is much similar with the real cotton towels, because the towel has non-perforated meshes and enough thickness (90gram/m²); so, the towel touched comfortable and has good water absorbant; when the towels is taken out from the towel dispenser, it can hold the hot or ice-cold much longer than other series towel rolls.

The naming rule of Nonwoven Towel rolls is "090-9-W", the number "090" stands the gram is 90gram, the number "9" stands there are 9 meshes per square inch on the towel, the "W" stands the color of the towel is white.

To the gram of this style, we can make from 45gram up to 120gram; to the color, we can make any color as per the customer's requirement.

090 22 towel

Towel roll white
